# Presentación

La Oficina Nacional de Estadística (ONE) pone a disposición de los usuarios y público en general los resultados definitivos del IX Censo Nacional de Población y Vivienda 2010, relativos a las características económicas de la población. Este operativo censal se desarrolló durante siete días consecutivos, desde 1 al 7 de diciembre del 2010, en todo el territorio de la República Dominicana, incluyendo sus aguas jurisdiccionales, con la participación de toda la sociedad dominicana.

Con este levantamiento se dio cumplimiento a lo establecido en la Ley No. 5096 sobre Estadística y Censos Nacionales y lo dispuesto en el Decreto del Poder Ejecutivo No. 81-10, de fecha 13 de febrero del año 2010, que declaró al IX Censo Nacional de Población y Vivienda 2010 como proyecto de prioridad e interés nacional a realizar en el año 2010.

El censo de población y vivienda es la principal operación estadística que desarrolla el país, razón por la cual se torna en una fuente de información de trascendental importancia a nivel nacional y local. En consecuencia, la información proporcionada por el censo se constituye en un insumo de relevancia para la orientación, implementación y evaluación de las políticas públicas, así como para el desarrollo y evaluación de intervenciones en el ámbito civil. En forma adicional, los datos censales son de gran utilidad en la toma de decisiones en el campo del comercio y la industria, sin dejar de lado su importancia como fuente para la producción de conocimiento.

La publicación de este documento, denominado Volumen V: Características Económicas, con datos acerca de la fuerza de trabajo y sus principales atributos, forma parte de un programa de difusión de los resultados censales iniciado en el mes de marzo del 2011, con la puesta en circulación del primer informe de resultados censales, el cual contiene las cifras preliminares sobre la población y las viviendas del país. Posteriormente, el 24 de mayo del 2012 se puso en circulación el Informe Básico, el cual contiene información acerca de la población y las viviendas, desagregada a nivel de región, provincia, municipio y distrito municipal. Con posterioridad a este documento se publicó el Volumen I, denominado Informe General, en el cual se incluyen datos sobre los volúmenes poblacionales desagregados en función de las principales características de las personas, así como informaciones acerca de los hogares y las viviendas; el Volumen II, con información acerca de la vivienda y el hogar, de acuerdo a sus principales atributos; el Volumen III, en el cual se presentan datos acerca de la población y sus características demográficas básicas; y el Volumen IV: Características Educativas, con informaciones acerca de la población, en función de las diferentes categorías que conforman los atributos de la escolaridad.

En adición a esos cinco volúmenes se contempla la publicación de otros dos, los cuales estarán destinados a presentar información relativa a otros aspectos estudiados en el IX Censo Nacional de Población y Vivienda 2010. El Volumen VI: Migración, Fecundidad y Mortalidad contendrá información acerca de esas tres variables de la dinámica demográfica; mientras que en el Volumen VII: Características del Entorno de la Vivienda y el Hogar, se expondrán datos relativos a algunos atributos del entorno de los hogares y las personas.

Como forma de garantizar el acceso a la información, por parte de la mayor cantidad de usuarios, además de las publicaciones impresas se contempla la divulgación de los resultados censales definitivos mediante medios electrónicos.

La Oficina Nacional de Estadística, al presentar estos resultados relativos a las características económicas de la población, hace propicia la ocasión para expresar su agradecimiento a la población dominicana en general, por su apoyo invaluable para que la gran jornada que significó el IX Censo Nacional de Población y Vivienda 2010 alcanzara sus objetivos, así como a los estamentos de la sociedad que con su participación nos permitieron cumplir con nuestra misión.

# Introducción

En la República Dominicana existen experiencias sobre la cuantificación de la población que datan del siglo XVII, cuando el gobernador Osorio ordenó el conteo de la población residente en los poblados de la costa norte. Sin embargo, el empadronamiento de la población bajo el concepto que actualmente se tiene de los censos se inició en el año 1920. A partir de ese año se han levantado nueve censos de población y vivienda, razón por la cual, al último de esta serie se le denominó **IX Censo Nacional de Población y Vivienda 2010**.

El inicio de los trabajos inherentes al **IX Censo Nacional de Población y Vivienda 2010** se remonta al mes de octubre del 2007, momento en el cual se delineó un esquema contentivo de las actividades preparatorias de esta jornada, acompañadas del correspondiente presupuesto. Acto seguido se comenzó a definir los aspectos conceptuales y metodológicos del censo, así como la elaboración de los instrumentos a utilizar con miras a la recolección de los datos.

La etapa del empadronamiento se desarrolló durante el periodo comprendido entre los días 1 y 7 de diciembre del 2010. El rol protagónico de este operativo recayó sobre un ejército constituido por unos 39,000 Empadronadores, coordinados por 10,300 Supervisores, quienes a su vez estuvieron dirigidos por 2,700 Encargados de Polígono. En el territorio, estos trabajos fueron dirigidos por 352 Encargados Municipales Censales, quienes dependían en forma directa de 48 Encargados Provinciales Censales.

En este operativo estadístico, a través de la boleta censal, se obtuvieron informaciones acerca de las características económicas, las cuales, entre otras formas de divulgación, se entregarán a los usuarios a través del presente informe, el cual está estructurado en cinco capítulos. El primer capítulo presenta información acerca de los aspectos geográficos de la República Dominicana, la división político-administrativa del país y un esbozo de la historia de los censos nacionales; en el segundo capítulo se muestran los resultados definitivos de los atributos económicos investigados, desagregados a nivel de región geográfica, provincia, municipio y distrito municipal.

En el tercer capítulo se describen los aspectos operacionales y metodológicos que sustentaron el operativo censal; en el cuarto capítulo se describen los conceptos básicos utilizados; mientras que en el quinto capítulo se presenta una breve descripción de la forma en que se difundirán los datos censales.

Finalmente se presentan dos anexos, en los cuales se presentan los instrumentos utilizados en la recolección de los datos censales. En el anexo I se muestra la boleta censal, mientras que en el anexo II se presenta una lista de todas las personas que participaron en el **IX Censo Nacional de Población y Vivienda 2010**.

# 1. Generalidades

## 1.1 Aspectos geográficos

La información del IX Censo Nacional de Población y Vivienda 2010, como la de cualquier otro estudio de esta naturaleza, está referida a los espacios geográficos donde habitan las personas residentes en el país. En consecuencia, es importante que los usuarios de los datos conozcan algunos elementos básicos del contexto territorial al cual pertenecen. En este caso se hará referencia a la localización geográfica de la República Dominicana, por la utilidad que podría tener para aquellos usuarios de ultramar sin muchos conocimientos acerca del país, y a la división político-administrativa, dado que gran parte de los datos censales se presentan en forma desagregada en función de las unidades territoriales.

### 1.1.1 Localización de la República Dominicana

La isla de Santo Domingo forma parte del archipiélago de las Antillas Mayores y es la segunda en extensión territorial, dado que Cuba es la de mayor dimensión. Se localiza en el hemisferio norte y al sur del trópico de Cáncer. Sus coordenadas geográficas son: 17° 36' y 19° 58' latitud norte y 68° 19' y 72° 01' longitud oeste.

Llamada por los aborígenes Quisqueya, fue nombrada como la Española o la Hispaniola por los españoles a su llegada. Se encuentra dividida en dos estados independientes: República Dominicana en la parte oriental y la República de Haití en la parte occidental.

La extensión territorial de la isla es de unos 77,914 kilómetros cuadrados, de los cuales, 48,310.97 km<sup>2</sup> corresponden al área principal del territorio de la República Dominicana, incluidos los 265 km<sup>2</sup> del área del lago Enriquillo.

La República Dominicana limita al norte con el océano Atlántico que la separa de las islas Caicos y Turcas; al este con el canal de La Mona que la separa de Puerto Rico; al sur con el mar Caribe o de las Antillas; y al oeste limita con la República de Haití.

## 1.1.2 División político-administrativa

La República Dominicana se encuentra dividida en un Distrito Nacional y 31 provincias como unidades político-administrativas mayores. A su vez, estas demarcaciones territoriales están constituidas por 155 municipios y 231 distritos municipales.

Las 32 unidades territoriales mayores están nucleadas en 10 regiones administrativas creadas a partir del Decreto Presidencial No.710-04 del 30 de junio de 2004, las cuales, a su vez, están agrupadas en tres macrorregiones: *Cibao*, constituida por las regiones: Cibao Norte, Cibao Sur, Cibao Nordeste y Cibao Noroeste; la *Suroeste*, formada por las regiones: Valdesia, Enriquillo y El Valle; y la *Sureste*, compuesta por las regiones: Yuma, Higuamo y Ozama o Metropolitana.

La República Dominicana tiene forma de triángulo, cuya base es la línea fronteriza con la República de Haití. La irregularidad de sus lados le da un perímetro de 1,963 km. La línea costera se extiende unos 1,576 km y la línea fronteriza con la República de Haití 388 km.

Sus dimensiones son: 390 km de longitud, desde cabo Engaño, en la provincia La Altagracia, hasta el paraje Las Lajas en la provincia Independencia y 265 km de ancho, desde cabo Isabela, en la provincia de Puerto Plata hasta el cabo Beata, en la provincia de Pedernales.

## 1.2 Antecedentes censales

Desde los primeros censos levantados en el país, se ha recolectado información sobre las características económicas de la población. En este contexto, los principales temas que se han investigado se refieren a: condición de ocupación, rama de actividad económica, categoría ocupacional, tiempo trabajado y en algunos censos se ha obtenido información relativa a los ingresos, como es el caso de los levantados en los años 1950, 1960, 1993 y 2002.

En el V Censo Nacional de Población y Vivienda de 1970 se indagó sobre la situación ocupacional con la finalidad de determinar el volumen de personas ocupadas, las desocupadas y las inactivas. Además se obtuvo información acerca de la ocupación principal de los miembros del hogar de 10 años y más, la rama de actividad económica y la categoría ocupacional<sup>1</sup>.

La forma de preguntar acerca de las características económicas en el VI Censo Nacional de Población y Vivienda de 1981 fue diferente a la utilizada en el censo de 1970. Se obtuvo información sobre la condición de ocupación referida a la semana anterior al censo; se recolectó información sobre los ingresos o pagos recibidos por concepto de trabajo la semana anterior al censo. En el caso de las personas que declararon estar desocupadas se preguntó si habían buscado trabajo la semana anterior al censo; además, se obtuvo información sobre trabajo familiar sin remuneración.

En el caso de las personas de 10 años y más desempleadas, el censo de 1981 indagó si habían realizado algún trabajo por paga con anterioridad, así como el tiempo que llevaban sin trabajo en el caso de los desempleados. A su vez, cuando se trataba de las personas ocupadas, se recolectó información acerca del número de horas trabajadas durante el período de referencia, información que no fue captada en otros censos.

A través del VI Censo Nacional de Población y Vivienda de 1981 también se obtuvo información sobre la rama de actividad de la empresa o negocio donde trabajan los miembros del hogar, así como la categoría ocupacional y el tipo de empresa en que laboraban las personas que declararon estar empleadas. En este censo, a diferencia de los demás, se recolectó información sobre los ingresos correspondientes al año anterior.

En el VII Censo Nacional de Población y Vivienda de 1993 se indagó acerca de las características económicas tradicionales. Esto es, condición de ocupación, ocupación principal, categoría ocupacional y rama de actividad económica de la empresa o negocio donde labora la persona. En forma adicional se preguntó acerca de los ingresos recibidos por el trabajo, así como por otros conceptos.

Con relación a las características económicas de la población, la boleta del VIII Censo Nacional de Población y Vivienda de 2002 incluyó preguntas acerca de la condición de ocupación, ocupación principal, categoría ocupacional, tipo de empresa para la cual laboran las personas que declararon estar trabajando durante el período de referencia y rama de actividad económica. En forma adicional, se obtuvo información sobre el número de personas que trabajan en la empresa, negocio o institución y sobre el monto de los ingresos percibidos el último mes por concepto de salario, renta, pensión, jubilación, intereses o cualquier otra entrada.

En el VIII Censo Nacional de Población y Vivienda de 2002, para las personas que no tuvieron empleo la semana previa al empadronamiento, se preguntó si estarían dispuestas a trabajar si le ofrecieran un empleo; y en el caso de aquellas que no trabajaron, pero estarían dispuestas a trabajar, se preguntó por los motivos que tuvieron para no buscar trabajo durante el período de referencia.

<sup>1</sup> A diferencia de los demás censos, en el V Censo Nacional de Población y Vivienda de 1970 se preguntó acerca de la ocupación habitual referida al último año anterior al censo.

## 2.Resultados censales

Con el propósito de facilitar el acceso de los usuarios a los resultados del IX Censo Nacional de Población y Vivienda 2010, la Oficina Nacional de Estadística ha diseñado la estrategia de divulgación que contempla la elaboración de productos de difusión impresa y digital. El presente documento representa el quinto volumen impreso a publicar a modo de resumen con información sobre las características económicas. El segundo componente de diseminación de resultados consiste en la utilización de Internet y la preparación de CD.

La presentación de los resultados censales relativos a las características económicas consiste en un conjunto de cuadros y gráficos donde se presenta la población de 10 años y más clasificada en función de las diferentes características económicas consideradas, desagregadas de acuerdo a algunos atributos geográficos, demográficos y socioeconómicos.

Las informaciones recolectadas, por medio de la boleta censal, otorga los insumos necesarios para clasificar a la población en edad de trabajar en económicamente activa (PEA) y no económicamente activa (PNEA). Igualmente, a través de estas informaciones se puede obtener una caracterización general de la situación en que se encuentra el mercado laboral en la República Dominicana, al momento de realizarse el Censo.

Este volumen está conformado por 14 cuadros y 7 gráficos. A través de estos últimos instrumentos estadísticos se presenta el comportamiento de algunas de las variables estudiadas, en función del contexto geográfico de que se trate.

## 3. Aspectos operacionales y metodológicos

### 3.1 Universo

Abarca todo el territorio de la República Dominicana y sus aguas jurisdiccionales, incluyendo todos los residentes habituales del país, así como todas las viviendas y hogares localizados en el territorio nacional.

### 3.2 Tipo de censo

El **IX Censo Nacional de Población y Vivienda 2010** fue un censo de derecho o de jure, es decir, se empadronó a todas las personas residentes habituales en los hogares, independientemente del lugar donde se encontraran en el momento del empadronamiento.

### 3.3 Período de levantamiento

El levantamiento de la información del IX Censo Nacional de Población y Vivienda 2010 se realizó durante siete días, del 1 al 7 de diciembre de 2010. Además, dos días previos al empadronamiento se realizó el recorrido de reconocimiento de las áreas, y durante los dos días posteriores al levantamiento se desarrolló la encuesta de cobertura y calidad censal.

### 3.4 Período de referencia

El período de referencia de la información censal, a nivel general, es la mitad del período de empadronamiento. Sin embargo, se utilizaron otros períodos de referencia para temas específicos. Para las características económicas se tomó como período de referencia la semana anterior al día de inicio del empadronamiento, mientras que con el propósito de recopilar datos, que sirvan de plataforma para el estudio de la migración reciente, se captó información acerca del lugar de residencia habitual cinco años antes a la fecha del levantamiento, es decir, noviembre del 2005. Los datos sobre mortalidad se refieren al período comprendido entre 1.º de enero del 2009 y el 31 de diciembre de ese mismo año.

### 3.5 Método de recolección

La recolección de datos se realizó mediante entrevistas directas, visitando cada uno de los hogares existentes en las viviendas ocupadas o locales utilizados como vivienda. Las entrevistas fueron conducidas por Empadronadores debidamente capacitados, quienes debían de hacer el esfuerzo por entrevistar a los miembros del hogar, y en caso de aquellos miembros ausentes y de los que no estaban aptos para ofrecer las informaciones, se procuró un informante adecuado para que ofreciera las informaciones de los miembros habituales del hogar. Para fines del censo se consideró como informante adecuado a toda persona, de 15 años o más de edad, que conociera las informaciones solicitadas en la boleta censal para cada uno de los miembros del hogar.

### 3.6 Residente habitual

Es la persona que vive normalmente en el hogar, esto es, que duerme ahí, prepara sus alimentos, come y se protege del ambiente, y por ello lo reconoce como su lugar de residencia. Incluye al personal doméstico y a sus familiares si duermen en la vivienda y a las personas que en el momento de la entrevista están presentes en la vivienda y no tienen otro lugar fijo donde vivir; así como aquellas personas o grupos de personas que se alojan en lugares o espacios que no son vivienda propiamente.

### 3.7 Unidades de empadronamiento

Al igual que en los censos anteriores, las unidades de empadronamiento son: la *persona*, el *hogar* y la *vivienda*. Las personas son todos los residentes habituales de los hogares censales. A su vez, se consideró el hogar como una unidad de cohabitación y alimentación, formada por una sola persona o varias con o sin lazos familiares que, a su vez, tienen la vivienda como unidad física de interacción. En términos operativos, se utilizó como criterio, para la identificación de hogares dentro de la vivienda, el alimentarse de las mismas comidas o compartir los demás gastos comunes.

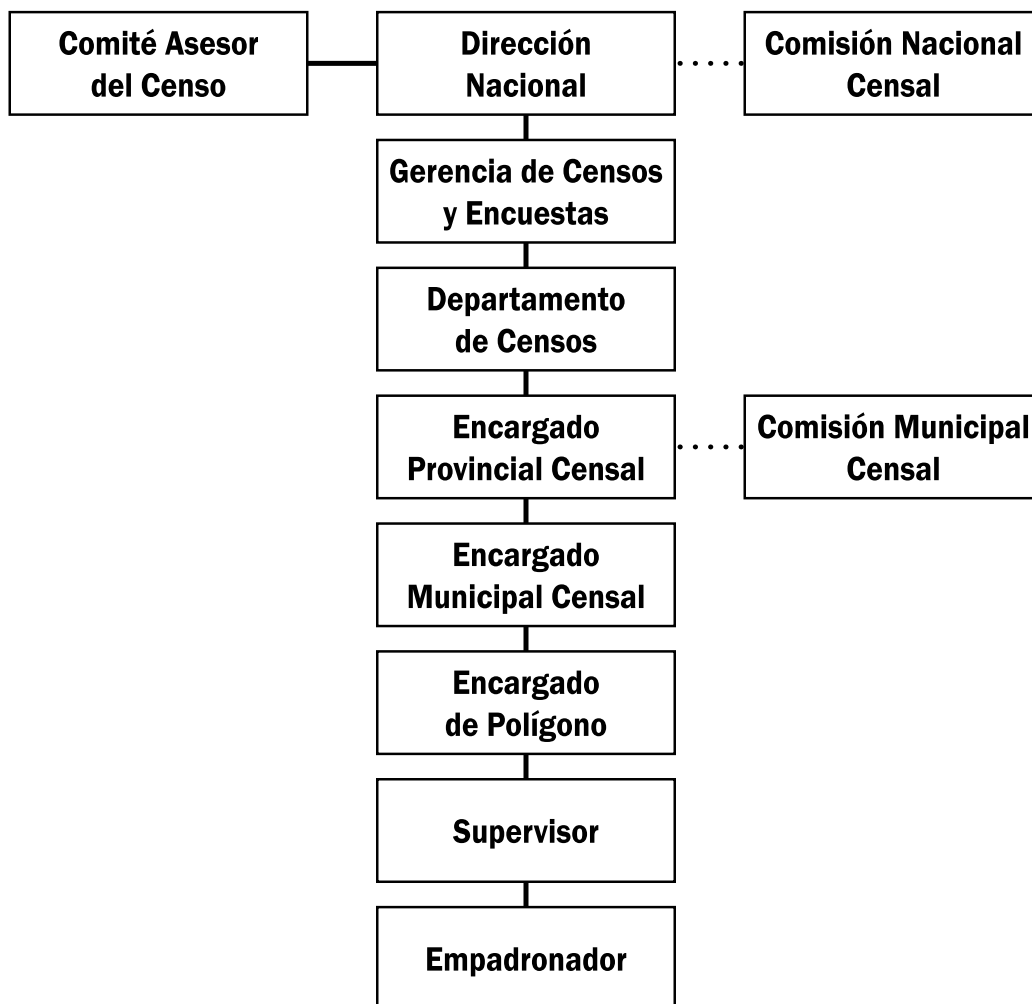

Para los propósitos censales se consideró como vivienda todo local con entrada independiente y delimitada por paredes, muros o cercas, y cubierto por un techo, convertido o dispuesto para el alojamiento permanente o temporal de personas con vínculo familiar o no. También se empadronó como vivienda un negocio, tienda o taller dentro del cual se ha separado una parte para residir, así como cualquier local, fijo o móvil, que al momento del censo estuviese ocupado como lugar de alojamiento permanente.

### 3.8 Estructura operativa censal

La estructura operativa del **IX Censo Nacional de Población y Vivienda 2010**, muestra los niveles jerárquicos, formas de articulación y canales de comunicación que se establecieron para el logro de los objetivos. El Director de la Oficina Nacional de Estadística, como máxima autoridad de este organismo, tuvo la responsabilidad de dar los lineamientos de política para la organización, planificación, desarrollo y control de la ejecución censal. Se hizo ayudar del Comité de Apoyo Interno al Censo, y posteriormente por el Comité Asesor y de Control de Gestión del Censo, conformado con el objetivo de dar recomendaciones a la Dirección Nacional acerca de diversos aspectos relacionados con el censo. De igual manera, recibió el respaldo de la Comisión Nacional Censal. La Gerencia de Censos y Encuestas a través del Departamento de Censos tuvo a su cargo la conducción técnica, normativa y operacional del **IX Censo Nacional de Población y Vivienda 2010**.

Para facilitar las operaciones del censo se crearon 48 provincias censales y 352 municipios censales. Esta estructura operativa permitió que se hiciera una distribución de la carga de trabajo, relativamente homogénea, para el personal que tuvo la responsabilidad de conducir el censo en el territorio.

## 4. Conceptos básicos utilizados

**Actividad económica.** Es la combinación de acciones cuyo resultado es la producción de bienes, la prestación de servicios y/o compra-venta de mercancías. Es decir, una actividad económica tiene lugar cuando se combinan recursos tales como equipos, mano de obra, técnicas de fabricación, entre otros, para obtener determinados bienes, proporcionar servicios o para la compra-venta de mercancías.

**Actividad no económica.** Es la acción destinada para satisfacer necesidades personales o familiares, necesarias para el funcionamiento del hogar, la familia y sus miembros, cuya realización excluye bienes y servicios para el mercado.

**Ayudó en un negocio familiar o no familiar.** Es la persona de 10 años y más que trabajó, en la semana de referencia, apoyando las actividades económicas de un negocio familiar o no familiar.

**Categoría ocupacional.** Es la vinculación que existe entre las personas que trabajan y su ocupación. En este sentido, la población ocupada puede ser clasificada en:

**Empleado(a) a sueldo o salario.** Es la persona que mantiene una relación de dependencia con la institución para la cual trabaja y que recibe remuneración por su trabajo en forma de sueldo y salario en dinero o en especie.

**Empleador(a) o patrón.** Es la persona que dirige su propia empresa o ejerce por su cuenta una profesión u oficio, utilizando uno o más trabajadores remunerados, aparte de ayudantes no familiares o familiares no necesariamente remunerados.

**Trabajador(a) familiar o no familiar sin paga o ganancia.** Es quien trabaja en la empresa, finca o negocio de un familiar o no familiar, durante el período de referencia (semana anterior a la fecha de inicio del levantamiento), sin percibir remuneración en dinero. Sin embargo, si reciben regularmente un pago en dinero preestablecido, que puede ser considerado como un salario, deben ser registrados como empleados u obreros.

**Trabajador(a) por cuenta propia.** Es la persona que no depende de un patrón, ni tiene empleados u obreros a su cargo. Es una empresa unipersonal, no constituida en sociedad, vende y/o produce bienes y/o servicios por lo que cobra un precio. Ejemplos: abogados, ingenieros, plomeros, electricistas, vendedores ambulantes, artesanos, etcétera.

**Condición de actividad.** Es la situación que distingue a la población de 10 años y más según sea activa o inactiva económicamente.

**Condición de ocupación de la persona.** Es la situación que distingue a la población económicamente activa en ocupada y desocupada, de acuerdo con el desempeño o búsqueda de una actividad económica en la semana de referencia.

**Desalentado.** Es toda persona de 10 años cumplidos y más que durante el periodo de referencia utilizado para el levantamiento censal, no tenía empleo, no realizaba actividad alguna por paga o ganancia, no había buscado trabajo, independientemente de que haya trabajado antes, pero estaba en disposición de trabajar si se le ofrecía un empleo.

**Disponibilidad para trabajar.** El criterio sobre la disponibilidad de trabajar se refiere a la población que, dentro de una edad especificada no trabaja y no ha buscado trabajo en el período de referencia inmediato, pero aceptaría un empleo al momento que se le ofreciera.

**Empleado(a).** Es toda persona que trabaja en un establecimiento prestando servicio a un jefe, empresa, negocio o dependencia pública o privada, recibiendo o no una remuneración en forma de sueldo, salario, comisión, propina, o pago en especie. Incluye a las personas que trabajan fuera del establecimiento dependiendo laboral y legalmente del mismo.

**Empresa.** Es toda organización definida jurídicamente, con contabilidad independiente, sometida a una actividad rectora que puede ser una persona jurídica o una persona física, y constituida con miras a ejercer en uno o varios lugares una o varias actividades de producción de bienes o prestación de servicios.

**Estudiante.** Es el miembro del hogar que a la fecha del Censo se encuentra dedicado a cursar estudios, generalmente en un centro de enseñanza, y no realiza ninguna actividad económica.

**Jubilado(a) o pensionado(a).** Es la persona que no realiza actividades económicas, pero que recibe un ingreso o pensión por parte de alguna institución de seguridad social o de una empresa como resultado de una prestación laboral.

**No trabaja por discapacidad.** Es la persona de 10 años o más que no realiza un trabajo o actividad económica a causa de un impedimento físico o mental.

**Ocupación principal.** Se refiere a la ocupación principal que tuvo la persona en la semana de referencia. Es decir, una persona puede declarar que en la semana anterior al censo desempeñó varias ocupaciones. El trabajo del empadronador estuvo orientado a determinar, junto con el informante, la que él considera principal o más importante.

**Ocupación.** Es el tipo de trabajo que realiza una persona que se declara como ocupada durante el período de referencia, o el tipo de trabajo que realizaba una persona cesante en su último empleo.

**Población cesante.** Se refiere a la población de 10 años y más que ha trabajado o ha tenido empleo anteriormente, pero que en la fecha del censo se encuentra desempleada o desocupada.

**Población desocupada.** Es el total de personas de 10 años y más que en la semana de referencia declaró no tener trabajo, pero durante el período de referencia realizaron diligencias para buscar un trabajo.

**Población económicamente activa (PEA).** Es el total de personas de 10 años y más que trabajaron en actividades económicas durante la semana de referencia, además de las que no trabajaron, pero que buscaron activamente un empleo durante el mismo período.

**Población no económicamente activa.** Es el total de personas de 10 años y más de edad que no trabaja y no buscó trabajo durante el período de referencia. Incluye a los estudiantes, amas de casa, rentistas, jubilados, incapacitados para trabajar, etc., que no desarrollan ninguna actividad económica.

**Población ocupada.** Es el total de personas de 10 años y más que tuvo algún empleo o trabajo durante la semana de referencia. Incluye a quienes al momento del censo tienen trabajo, pero en la semana de referencia no asistieron por razones relacionadas con vacaciones, enfermedad, huelga, etcétera.

**Quehaceres domésticos.** Se refiere a las amas de casa que están dedicadas exclusivamente al cuidado de la familia y el hogar.

**Rama de actividad.** Se refiere al tipo de trabajo o servicio al cual se dedica o produce el establecimiento o negocio en el que la persona trabaja o trabajó.

**Rentista.** Es toda persona, de uno u otro sexo, no económicamente activa, que recibe rentas provenientes de propiedades u otras inversiones.

**Sector de actividad.** Es el primer nivel de agrupación de las actividades económicas afines en función de su similitud con el proceso de producción realizado en la unidad económica, empresa, negocio, establecimiento o lugar en donde la población ocupada trabajó en la semana de referencia. El sector primario comprende la agricultura, la ganadería, el aprovechamiento forestal, la caza y la pesca; el secundario incluye la minería, la extracción de petróleo y gas, la industria manufacturera, la generación y distribución de electricidad, la distribución de agua y la construcción; y el terciario engloba las actividades de comercio, transporte, Gobierno y otros.

**Tenía trabajo, pero no trabajó.** Se refiere a los miembros del hogar que, aunque ostentan un trabajo o empleo, a la fecha del Censo se encuentran ausente del mismo, debido a diferentes causas como son: vacaciones, licencia médica, paro por huelga, etc.
